Design An Island

You are a multi-billionaire! I will give you a minute to let that sink in. Ok, now to start spending. The first thing that you want is a nice vacation spot where you and your friends can hang out. All you have to do is design it and it will be built just the way you want it. Your island must include the following:

- Your island must have a theme
- Your island must fill the paper and be in FULL color
- It must have a title
- It must include 5 different landforms
- Each landform must be named; for example Kobe's Canyon or Lakers Lake
- You must include a compass rose
- MUST HAVE A GRID SYSTEM OF LATITUDE AND LONGITUDE THAT WE WILL DO IN CLASS
- WHEN FINISHED YOU WILL NEED TO COMPLETE THE 5 THEMES QUESTIONS ON THE BACK

This will be your first project and will be worth 75 points (50 for the island and 25 for the questions). Please use your time wisely and create the best project possible.

Have fun and be creative!

5 Themes Questions

1. **LOCATION:** Where is your island located? Look at an atlas to give me an absolute and relative location.

2. **PLACE:** What types of plants grow on your island? What kind of animal life is found there? What are the people like? What do they look like? What do they dress like? How do they speak?

3. **MOVEMENT:** How do the people move around the island? How do they communicate across long distances?

4. **HUMAN/ENVIRONMENT INTERACTION:** How do the people interact with their environment? Is there a lot of pollution? Do they have a positive or negative effect on the island?

5. **REGION:** What areas of the island have similar characteristics, either physical or human? (Physical characteristics like mountains, river, lakes, climate, animals; Human characteristics like language, clothing, government, food...)
